Live Video Simulcast with ambience effects, zap shots, and picture slideshows

1 HD Plasma Screen

| 2 HD Plasma Screens

Large plasma screens are mounted on two of our 8-foot trussing towers to simulcast the highlights of your reception. Your first dance, cake cutting, and all of your guests partying will be vividly shown on our liquid plasma screens for all to see. Digital still photos of your guests, music videos, special effects and custom graphics are also broadcasted throughout the evening.

A "Picture Video Tribute" is created in honor of the bride and groom on-site, and is shown during the reception. Depending on your videographer, we can record the highlights of the ceremony and play them during dinner. After the party, we will send you the new digital pictures with the highlights on DVD with your pre-approved background music selection's.

Our sharp plasma screens are truly an incredible addition to your entertainment package!
